Video Wall Management & KVM Operations Made Simple

ANY SOURCE. ANY DISPLAY.

Control what you see.

VuWall

# The VuWall Ecosystem
Video Wall Deployments Redefined

VuWall provides a complete ecosystem of interoperable products built on a unique standards-based architecture that provides the most effective distribution of visual information, from any source to any display or video wall, throughout organizations. At the center of the ecosystem is the TRx Centralized Management Platform, a single software platform for all visualization needs, combining advanced video wall management, KVM operations, and AV distribution in control rooms and corporate environments.

**Distribute** — Stream sources from computers, remote desktops, and cameras to any multiview display.

Visualize — Efficiently aggregate content on single displays or multi-surface configurations.

Manage — Manage multiple sites from one centralized plarform and create custom control panels.

Control — Simply control sources locally or remotely from customized operator workstations.

VuWall

Increasing Productivity and Enhancing Visualization Experiences
in Professional and Mission-Critical Applications

VuWall develops solutions to manage visual information easily and securely on video walls and displays throughout facilities. VuWall's secure ecosystem simplifies workflows to increase operator efficiency with interoperability and ease of use by facilitating the distribution of visual information from any source to any single display, multi-display, video wall, or KVM operator desktop — all through easy drag-and-drop or customizable control panels.
