

## VuStream Encoders & Multi-View Decoders

### Delivering high quality video streams across your network

VuStream™ series of encoders and decoders include a range of appliances available in various form factors, resolutions, and performance features. VuStream appliances are compatible with PAK video wall nodes, VuScape controllers, and can be centrally configured and managed by the TRx centralized management software platform.

### VuStream Benefits

#### Performance Encoding

Deliver low latency high performance 4K video streams up to 4:4:4.

#### Single Vendor

A complete range of encoders and decoders for all needs.

#### Centralized Management

Single common configuration and operation platform.

#### Interoperable

Compatible with 3<sup>rd</sup> party brands. Supports H.264, H.265, SDVoE, NDI, SRT, and more.

### VuStream Applications

#### Control Rooms

#### Corporate Workspaces

#### Experience Centers

#### Crisis Rooms

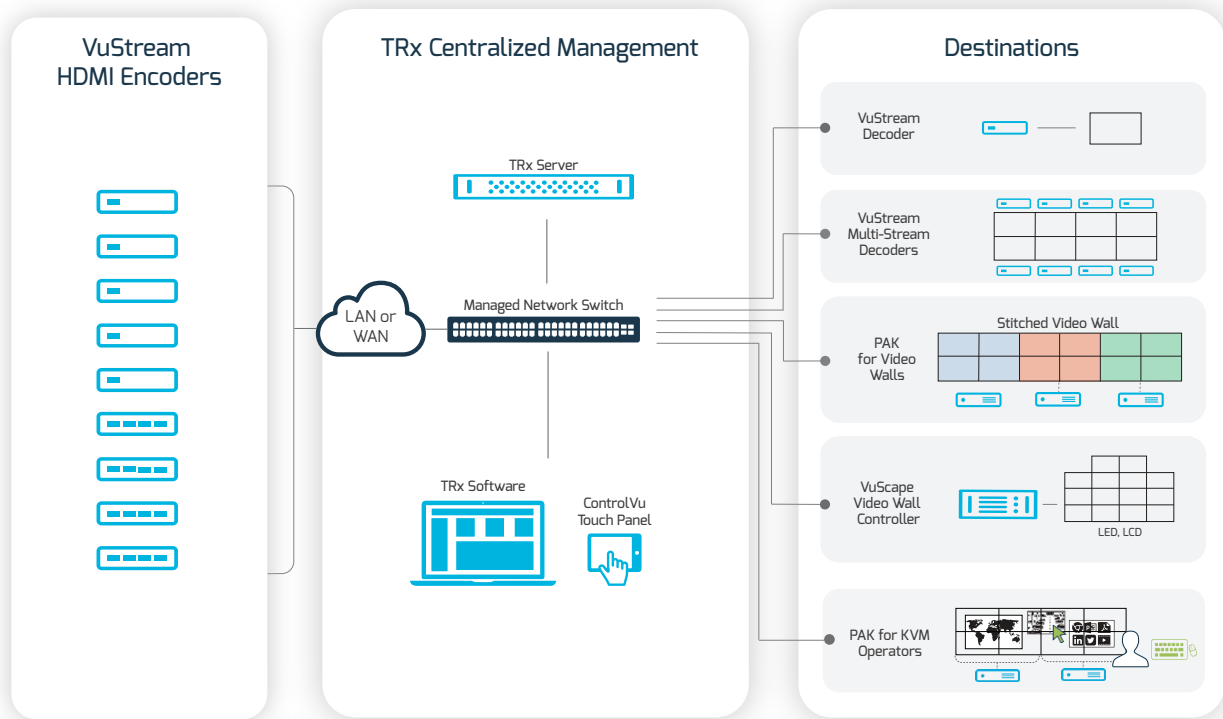

#### Lobby Signage

#### Classrooms & Auditoriums

## VuStream 150 Encoder

### PoE Powered, H.264 HDMI AV Encoder

The VuStream 150 encoder appliance can transmit HDMI signals up to 3840x2160@60Hz resolution over standard networks using H.264 codec. Streams can be sent over unicast or multicast to PAK Video Wall & KVM processing nodes configured as an operator station or as a video wall; VuScape video wall controllers or standard players like VLC. The VuStream 150 can be set with user-defined low bitrates for excellent quality and low network bandwidth consumption.

The VuStream 150 offers a high quality, cost effective video-over-IP solution featuring an open architecture for interoperability, excellent I/O functionality and powerful software features.

## Features

- ✓ HDMI 4K60 encoding with audio
- ✓ H.264 and low-bandwidth for AV-over-IP
- ✓ 4:4:4 pass-through
- ✓ 4:2:0 or 4:2:2 streaming
- ✓ Power over Ethernet (PoE)
- ✓ Low latency between encoder and PAK Nodes
- ✓ Compatible with third-party software (e.g. VLC)
- ✓ Compact design

## VuStream E220-2 & E240-2 Encoders

### H.264 HDMI Video Encoders

The VuStream E200 Series of encoders transmit HDMI signals up to 4096p2160@60Hz resolution over standard networks using H.264. Stream either unicast or multicast to the VuScape controller decoding cards, to PAK Video Wall Nodes or to standard players like VLC. The VuStream E200 Series can be set with user-defined low bitrates for excellent quality and low network bandwidth consumption. It can also record to a shared network or NAS drive.

The VuStream E200 Series of encoders is a high quality, cost effective video over IP solution featuring an open hardware architecture for interoperability, excellent I/O functionality and powerful software features.

## Features

- ✓ HDMI and digital audio inputs or analogue audio inputs
- ✓ H.264 compression for high-quality, low-bandwidth AV-over-IP
- ✓ 4K/UHD with configurable multi Chroma sub-sampling in 4:4:4, 4:2:2, 4:2:0
- ✓ Open encoding allows for third-party software decode (e.g. VLC)
- ✓ Standard Ethernet Network operation with 10/100/1000 Mbps
- ✓ Unicast and multicast through UDP, RTP & RTSP
- ✓ Compatible with all VuWall solutions

## VuStream 320 & 340 Encoders/Decoders

### Fully Integrated IP KVM Solution

The VuStream 320 & 340 is an IP KVM encoder and decoder solution that delivers 3840x2160@60Hz 4:4:4 UHD performance and quad-monitor capabilities over standard Gigabit Ethernet at unprecedented low bitrates.

VuStream 320 & 340 can be configured as a point-to-point or as a networked KVM matrix delivering multiple video, keyboard, mouse, USB and audio signals using a single fiber or copper cable. It works with standard network switches to deliver a scalable IP KVM matrix solution. VuStream 320 & 340 is also compatible with VuWall's VuScape Series 2 Video Wall Controllers to display content directly on video walls without requiring additional equipment.

## Features

- ✓ Full IP-based KVM encoder and decoder solution
- ✓ Dual or Quad encoders and decoders
- ✓ Extend signals up to 3840x2160 @ 60Hz at a very low bitrate with very high quality in 4:4:4
- ✓ Standard 1G Ethernet network operation
- ✓ Easy configuration of a scalable KVM matrix over IP with unicast and multicast support
- ✓ View and control multiple sources simultaneously and work more efficiently on one station; take control of a remote source easily by moving the mouse to the target source
- ✓ Streams can be directly decoded on any VuScape Series 2 controller
- ✓ Full control via TRx management platform

## VuStream 350 IP KVM Encoder

The VuStream 350 is a secure and fanless IP KVM encoder that delivers high-quality up to 4K video, over standard Gigabit Ethernet at low bitrates and ultra low latency. VuStream 350 transmits video & audio (over HDMI), as well as keyboard and mouse on an encrypted AES-256 signal. It is fully compatible with VuWall's TRx Centralized Management Software, ControlVu PoE Touch Panels, and PAK Video Wall and KVM nodes, allowing operator workstations to control the sources connected to VuStream 350 at low latency, making it imperceptible to the user that they are controlling a remote device.

## Features

- ✓ High-quality 4K/UHD encoding and low-bandwidth for AV-over-IP
- ✓ Compact and fanless design
- ✓ Secure end-to-end video distribution with AES 256-bit encryption
- ✓ Full control via TRx Centralized Management Software Platform
- ✓ Configurable chroma sampling with support for 4:4:4 and 4:2:0
- ✓ Ultra-low latency between encoder and PAK destinations
- ✓ Extend video, audio, keyboard, and mouse.
- ✓ Fully compatible with PAK Video Wall and KVM nodes

## VuStream 550 All-in-One SDVoE Encoder/Decoder

The VuStream 550 all-in-one compact appliance can be used as an SDVoE encoder or decoder, for fiber or copper infrastructures. It is designed for distributing 4K60 video and audio over standard 10Gb IP network switches with no latency. The VuStream 550 provides an ultra-scalable, easy to deploy, highly reliable solution, providing incredible flexibility in system design and workflows.

The VuStream 550 is ideal for projects where quality and latency are paramount. In combination with the VuWall TRx centralized management platform, this solution simplifies the management and deployment of devices, saving system integrators time and money.

## Features

- ✓ Distribute 4K60 4:4:4 digital video over standard 10G networks
- ✓ SDVoE™ encoder/decoder with no latency
- ✓ 128-bit AES encryption
- ✓ Compact and fanless design with encoding & decoding, fiber & copper in one device
- ✓ Power over Ethernet (PoE 802.3at)
- ✓ SFP plug connection for fiber, bi-directional IR, RS-232, and Ethernet extension.
- ✓ HDMI with HDCP 2.2 support
- ✓ Supports Wall Mode, Multiview Mode
- ✓ Support for USB routing
- ✓ Compatible with the TRx centralized management software to configure and manage appliances

<b>Encoding/Decoding</b>	
Streaming Protocol	SDVoE (IP streaming over 10G network with no latency)
Compression	Uncompressed up to 10Gb/s on higher data rates minimal lossless compression ratio
Encryption	End-to-end AES 128bit encryption
Modes	The device can be used as an encoder or decoder (configurable) and in fiber or copper mode (configurable)
Scaling and Cropping	Upscaling, downscaling, cropping, and auto-scaling for seamless switching and fixed resolutions
<b>Features</b>	
Basic Configuration	Configuration via DIP switches on appliance
IP Matrix Mode	Switch any source from an encoder to a decoder
IP Video Wall Mode	Create video walls and simultaneously display multiple sources or stretched sources over video walls
IP Multiview Mode	Simultaneously display multiple sources through a single decoder
Configuration / API	TRx Software, REST-API

# The VuWall Ecosystem

## Unified Visualization & Video Wall Control

The VuWall ecosystem of interoperable products is built on a unique standards-based architecture that provides the most effective distribution of visual information, from any source to any display or video wall throughout organizations.

At the center of the ecosystem is the TRx Centralized Management Platform. TRx bridges AV, IT and IP systems ensuring interoperability and ease of use, simplifying AV-over-IP deployments, thus reducing deployment time and integration risk.
